A woman in the U.S. today has a 1 in 8 chance of developing breast cancer over her lifetime and a 1 in 43 chance of dying from breast cancer.

Nearly 30% of women diagnosed with early-stage breast cancer later develop metastatic breast cancer.

The average lifetime risk that a man in the U.S. will develop breast cancer is 1 in 726.

There are about 4 million breast cancer survivors in the U.S., including women receiving breast cancer treatment.

To reduce your risk of breast cancer, maintain a healthy weight, exercise regularly and don't drink alcohol.

**Team Spotlight** 

"Hi, my name is Agapetos a.k.a Tosh 😊

I have been blessed to be a part of the Spring Ridge team since the beginning of April 2025, and it was a blessing in disguise. I started off as a weekend receptionist and ended up full-time. I am glad I even applied and pushed myself out of my "stay at home mom, only church secretary" era, because I got to meet our beautiful residents and learn from their stories and their wittiness lol. In my spare time (which there is none), I sing in the praise and worship team at church. I teach dances in church and community events, and I love to cook for my husband and kids! I play piano and drums, and I love the SEAHAWKS, although my favorite color is Red 😂 I look forward to what God has in store for Spring Ridge and to continue serving and shining that light!
